Good afternoon Mr. Lawson and Mr. Krehbiel,

Thank you for responding to our request for feedback on how the U.S. Department might best serve the needs of its stakeholders. It is very helpful to hear how important the Office of STEM Education has been to the National Council for Teachers of Mathematics and the contribution that office has made as a point of contact to discuss STEM education and in providing information to the field. This is exactly the kind of feedback we need and we will certainly give it serious consideration as we move forward with our restructuring efforts.

Thank you, again, for providing an important perspective on the STEM Office and for your offer to help.
